

Dated: November 23rd, 2018

Honorable Sir,

We are reviewing the suggestions you have supplied to us from your Silicon Valley based contacts and we will revise the syllabus accordingly. The emphasis on cloud computing is well received. We are incorporating the latest breakthroughs of cloud native computing into the program, this will include cloud native infrastructure technologies such as Docker and Kubernetes. These technologies have been adopted by Amazon AWS and other cloud providers in the last few months.

My initial instinct was to maintain a small core team initially to remain focused, gain traction and launch this program quickly and subsequently add more stakeholders as we progress. Under your guidance, I will reach out to the Honorable Ministry of Information Technology for consultation. My team and I will do our best to keep to our timeline to announce the launch in December.

Prior to sending you the revised syllabus, we will also review the program the MoIT has received from Google to make further amendments. Please send it to me as soon as you receive it. The final product will be the best AI and Cloud Native Computing program in the world, and its graduates will help transform Pakistan over the years to come.

Thank you.

Yours Truly.
